Project Demo Requirements

Feature & Functional Requirements

This document summarizes the core features proposed for the project demo. The requirements are grouped by module to make them easier to convert into a functional prototype later.

01 Public Home Page

- A single homepage will be available to all visitors.
- Include a clear project/institution introduction section.
- Add a sliding image/banner section for announcements or visual highlights.

02 User Panels

- Provide two main panels: Admin Panel and Student Panel.
- Each panel should display features relevant to its user type.

03 Login & Authentication

- Provide separate login options for Admin and Students.
- Admin login must include OTP-based verification for additional security.

04 Attendance Management

- Support two attendance methods: MAC Address-based attendance and Scanner-based attendance.
- Store attendance records and make them accessible through the student portal.

05 Weekly & Monthly Reports

- Provide a dedicated weekly report page.
- Attendance/report data should be organized by week and updated according to the monthly cycle.

06 Notifications

- Display holiday notifications to relevant users.
- Provide a central notification area for important announcements.

07 Weekly Schedule & Tests

- Display the weekly class schedule.
- Show upcoming tests along with the relevant test topics.

08 Online Forms

- Provide an online admission form.
- Provide a comprehensive examination form.

09 Automatic Parent Notifications

- Automatically notify the parents/guardians of students who are marked absent.
- The system should generate the message based on the recorded attendance status.

10 Student Portal

- Students can view their attendance records through their portal.
- The portal can also provide access to schedules, notifications, reports, notes, and other academic information.

11 Portal Time Lock

- Admin can configure a specific time period for portal access.
- After the configured time, the relevant portal/functionality should become locked.

12 Notes & Study Material

- Provide a dedicated Notes & Study Material page.
- Organize notes by subject.
- Include additional study resources and academic material.
